

ProVation® Medical

# ProVation® MD Echocardiography

## Eliminate Transcription, Minimize Risk, Satisfy Clinicians

ProVation® MD Cardiology eliminates dictation for documentation and coding of echocardiography studies. ProVation MD interfaces with your system to capture measurements for accurate, compliant documentation.

- Intuitive navigation leads you quickly through procedure documentation
- Unique DocuDiagrams feature provides an intuitive graphical method to document findings
- Generates reports, letters and patient instructions automatically

### BENEFITS

- Improves efficiency
- Drives compliance
- Enhances revenue recovery

### WHY PROVATION®?

- Deep medical content
- Designed by physicians for physicians
- Intuitive navigation is easy to use
- High physician satisfaction rate

The screenshot displays the ProVation MD software interface for documenting echocardiography findings. At the top, it shows patient information: Patient Name: McGregor, Luke; MRN: 52423859854; Date of Birth: 12/12/1955. Below this is a navigation bar with tabs for Care Info, Measurements, Abia, Ventricles, Aortic/Mitral Valves, Tri/Pulm Valves, and Other. The main window is titled 'Measurements / Findings (Step 1 of 2)' and features a 'DocuDiagram' section. This section includes a 'Wall Motion Scores' grid with 12 categories: 0 (Hyperkinetic), 1 (Normal), 2 (Hypokinetic), 2a (Mildly Hypokinetic), 2b (Moderately Hypokinetic), 2c (Severely Hypokinetic), 3 (Akinetic), 4 (Dyskinetic), 5 (Aneurysm), 6 (Akinetic with Scar), 7 (Dyskinetic with Scar), 8 (Cannot Interpret), and 9 (Clear). Below the grid are four echocardiogram views: LONG AXIS (ENTIRE LV), SHORT AXIS (ANTERIOR), APICAL 4 CHAMBER, and APICAL 2 CHAMBER. Each view shows a diagram of the heart with numerical scores (1, 2, 3) assigned to various segments. A 'Text Format' section on the left allows for grouping by Wall, Severity, Segment, or Simple Description.

Mapped to more than 50 CPT and 620 ICD codes
